Associate Software Engineer | Java Full Stack Developer

PROFESSIONAL SUMMARY

Results-driven Full-Stack Java Software Engineer with hands-on experience building scalable, secure enterprise applications using Java 21, Spring Boot 3, Spring Security (JWT), and MySQL. Skilled in REST API design, high-concurrency systems, containerized deployments (Docker), and test-driven development (JUnit 5/Mockito). Experienced building responsive frontend UIs and collaborating in Agile teams to deliver features from design through production.

TECHNICAL SKILLS

Languages: Java 21, JavaScript (ES6+), TypeScript, SQL, C++

Backend: Spring Boot 3, Spring Security (JWT), Spring Data JPA, Spring MVC, Microservices, JDBC, Servlets

Frontend: React, HTML5, CSS3, JavaScript, Tailwind CSS, Bootstrap, RESTful APIs, JSON

Databases: MySQL 8.0, Schema Design, Indexing, Transaction Management, JPA/Hibernate

Testing & Tools: JUnit 5, Mockito, Postman, Swagger/OpenAPI 3.0, Integration Testing

DevOps: Docker, Docker Compose, Git, GitHub, Maven, CI/CD Fundamentals

Concepts: OOP, Design Patterns, Data Structures, RBAC, OTP Auth, Agile/Scrum

TECHNICAL PROJECTS

MultiVendor – Marketplace & Service Booking Platform

Java 21, Spring Boot, MySQL

- Architected a full-stack multi-vendor marketplace using Java 21, Spring Boot 3.2.5, Spring Security JWT, Spring Data JPA, and MySQL, supporting real-time slot bookings and earnings analytics.
- Implemented dual-identifier 6-digit OTP authentication (Email & SMS) with BCrypt password hashing and role-based authorization (CUSTOMER, VENDOR, ADMIN).
- Engineered a high-concurrency booking engine featuring 10-minute hold reservation daemons (@Scheduled background tasks) and pessimistic database locking to prevent overbooking.
- Integrated custom Google Meet video links, pre-filled mailto email dispatch, and real-time transaction timestamp payment receipt modals with 100% data isolation.

StudySync – Student Productivity Web Application

Java 21, React, Docker, Chart.js

- Developed 30+ RESTful APIs across 7 modules (Authentication, Tasks, Notes, Planner, Analytics) using controller-service-repository architecture and JWT security.
- Built a Pomodoro focus timer with Chart.js analytics and a normalized 7-table MySQL schema for data integrity.
- Containerized the platform with Docker Compose for one-command deployment; documented APIs using OpenAPI/Swagger and validated functionality with JUnit 5 and Mockito.

TRAINING & CERTIFICATION

Java Full Stack Development Trainee – Naresh i Technologies, Hyderabad

June 2026

EDUCATION

Master of Computer Science (M.Sc.) – New Arts Commerce & Science College, Shevgaon

2024 – 2026

Bachelor of Computer Science (B.Sc.) – New Arts Commerce & Science College, Shevgaon

2021 – 2024

HSC (12th) – Maharashtra State Board – Navajeevan Madhyamik & Uchha Madhyamik Vidyalaya, Dahigaon Ne

2020

SSC (10th) – Maharashtra State Board – LMGP College of Arts, Science & Commerce, Dahigaon Ne

2018

CORE COMPETENCIES

Problem Solving • Team Collaboration • Communication Skills • Debugging & Code Review • Agile/Scrum
